

List of participants

WISER Alfvén 2007 Conference, September 17-21, 2007

Name	Abstract Title	Country	Page
Marek Banaszekiewicz	Cosmic Vision and Space Research in Poland	Poland	2
Klaus Baumgärtel	Fluid versus Simulation Model of SW Solitons: Application to Ulysses Observations	Germany	3
Jan Błęcki	The Low Frequency Plasma Waves in the Polar Cusp Associated with Strong Fluxes of the Energetic Particles	Poland	4
Joe Borovsky	Turbulence and Fossil Structure in the Solar Wind	USA	
Sandra C. Chapman	Quantifying the Scaling Properties of the Solar Wind Intermittency, Anisotropy and Evolving Turbulence versus Coronal Driving	UK	5
Abraham C.-L. Chian	Intermittent Turbulence and Chaos in the Space Environment: Observation and Theory	Brasil	6
Giuseppe Consolini	Turbulence and/or Stochasticity in the Earth's Magnetotail Plasma Sheet	Italy	7
Mark E. Dieckmann	The Formation of Relativistic Ion Structures and their Potential Role in the Generation of Cosmic Ray Electrons	Sweden	8
Jonas Ekeberg	Ion-Acoustic Solitary Waves and Enhanced Ionospheric Radar Spectra	Sweden	9
Sean M. Finnegan	Stationary Alfvén Waves	USA	10
Tohru Hada	Transport of Energetic Particles by Large Amplitude Alfvén Turbulence	Japan	11
Lin-Ni Hau	Firehose Instability as a Source for MHD Turbulence	Taiwan	12
Bertrand Lembège	Dimensionality Effects on the Nonstationarity of a Perpendicular Collisionless Shock: Hybrid versus PIC Simulations	France	13
Wiesław M. Macek	Multifractal Models for Solar Wind Turbulence	Poland	14
Massimo Materassi	Turning the Resistive MHD into a Stochastic Field Theory	Italy	15
José T. Mendonça	Wave Kinetic Description of Alfvén Wave Turbulence	Portugal	16
Rodrigo A. Miranda	Complexity and Multistability in Nonlinear Alfvén Waves	Brasil	17
Einar Mjølhus	FLR Modelling of Dispersive Stationary MHD Structures	Norway	18

Name	Abstract Title	Country	Page
Erik Nordblad	Comments on the Dispersion Relation of Two-Fluid Waves	Sweden	20
Thierry Passot	Mirror Structures in Planetary Magnetosheaths: Simulations and Asymptotic Modeling near Threshold	France	21
Hans L. Pécseli	Low-Frequency Electrostatic Waves in the Ionospheric E Region: a Comparison of Rocket Observations and Numerical Simulations	Norway	22
Jolene S. Pickett	Nonlinear Electrostatic Solitary Waves Observed in Connection with Extreme Space Weather Conditions	USA	23
Raymond Pottelette	Acceleration by Strong Double-Layers: Turbulence and Radiation Generation	France	24
Erico L. Rempel	Origin of Transient and Intermittent Dynamics in Space Plasmas	Brazil	25
Ilan Roth	Impulsive Solar Electrons and Energization of Coronal Rare Elements	USA	26
Yoshitaka Saiki	Unstable Periodic Orbits of a Shell Model Turbulence	Japan	27
Ondrej Santolik	Structure of Wave Packets of Whistler-Mode Chorus	Czech Republic	28
Sergey Savin	Alfvénic Collapse and Plasma Jets: Impacts on the Sun-Earth Connections	Russia	29
Kristof Stasiewicz	Acceleration of Solar and Magnetospheric Plasma by Nonlinear Alfvén Waves	Sweden	30
Marek Strumik	Markovian Modeling of Intermittent Solar Wind Turbulence	Poland	31
Pierre L. Sulem	Alfvén Wave Filamentation in the Presence of Density Inhomogeneities	France	32
Bo Thidé	Studies of Plasma Turbulence with Methods Based on Electromagnetic Angular Momentum	Sweden	
Frank Verheest	How Elusive Are Large Amplitude Solitary Waves in Space Plasmas?	Belgium	33
Yuriy Voitenko	Kinetic Alfvén Waves in a Mixed Kinetic-Inertial Regime	Belgium	34
Emiliya Yordanova	Intermittent Turbulence at the Dayside Magnetosphere as Observed by Polar and Cluster	Bulgaria	35
